1. Name of Program: Workshop on Professional Ethics Workshop
2. Program Incharge: Dr SP Wadgaonkar
3. Venue: College Council Hall
4. Speaker: Dr A.W. Patil
5. Dates of Training programs undertaken: 05.10.2022
6. Objectives of Program
 - a. To describe framework for building culture of ethical behavior in medical teaching and research as professional
 - b. To list and explain practical ethical tools at work place.
7. Summary of Activities of the program:
8. The workshop was mainly interactive and lively with involvement of participant of mixed nature i.e postgraduate student, young teachers as well as teacher with good amount of teaching experience. The session begins with sharing experience of participant in specific scenarios given by the speaker as group task and asked to identify ethical challenges faced by the participants. Other group task was on ethical practices at work place may it be lab, OPD, Operation theatre or office. Varieties of responses were provided by the participants. The speaker summarises the key issues which should be used while developing a framework for creating ethical culture and professional practices adopted at workplace.

3. Venue: College Council Hall
4. Speaker: Mr Sunil Patil,
5. Dates of Training programs undertaken: 15.12.2022
6. Objectives of Program:
 - a. To list the statistical function applicable to research and academic outcome analysis
 - b. To develop template for research and academic outcome analysis using of MS office excel
7. Summary of Activities of the program:
8. The speaker commences training program highlighting relevant statistical function frequently used for mean, mode, median, standard deviation, correlation co-efficient, P-value, normal distribution curve and mapping of course and program outcome. After brief introduction of statistical terms and appropriate application for analysis of data, he gave demonstration to calculate statistical values from the set of data using built in function using excel sheet in a simplified manner describing steps for analysis. The session was followed with problem solving task given to each participant to calculate atleast one statistical function. The session was concluded with appreciation to speaker for his lucid way of presentation by the participant..

Workshop on “How to develop and use of professionalism mini clinical evaluation exercise [P-MEX] for clinical rotation of UG and PG students”

1. Program Incharge: Dr. Nitin Kulkarni
2. Venue: College Council Hall
3. Speaker: Dr RC Sharma, Dr Shahin Kazi, Dr Pranjali Shine
4. Dates of Training programs undertaken: 18.09.2022
5. Objectives of Program:
 - a. To list the outcomes of medical attributes measurable by P-Mex during clinical rotation of MBBS and MD/MS students
 - b. To develop template in different discipline for **use of professionalism mini clinical evaluation exercise [P-MEX] for clinical rotation of UG and PG students**
 - c. To use P-MEX as measuring tool to evaluate attainment of medical attributes
6. Summary of Activities of the program:
7. The speaker commences training program highlighting importance of P-MEX as measuring tool of outcomes of medical attributes relevant to professionalism and clinical skill during clinical rotation during their curricular training in different disciplines. Dr Shahin Kazi gave a brief overview of measurable outcomes to be evaluated for professionalism during clinical posting of MBBS/MD students in different subjects prescribed in CBME curriculum. Dr R.C. Sharma presented an example template and explained the methods to develop P-MEX. A group task was given to 5 groups with given clinical scenario of different discipline. The participants of each group were asked to present the P-MEX for review of peers. A vibrant proactive discussion was observed. Dr Pranjali Shinde enumerated the ways of feasibility of implementation of P-MEX for assessment of professionalism during clinical posting. Feedback of the participating faculty was encouraging. It was suggested that similar workshop be organized for all the faculty in small group to reinforce the concept and frequent use of P-MEX for professionalism evaluation.

Training Workshop on “Introduction to newer tools of Assessment in Clinical learning training outcomes”

- 1 Program Incharge: Dr. Nitin Kulkarni
- 2 Venue: College Council Hall
- 3 Speaker: Dr A.W. Patil, Dr RC Sharma,
- 4 Dates of Training programs undertaken: 08.10. 2022
- 5 Objectives of Program:
 - a. To Overview of advancement in Assessment tools to evaluation of attainment of competencies prescribed in CBME curriculum implemented in 2019.
 - b. To introduced newer methods of assessment tools to measure attainment of medical attribute with reference to CBME curriculum.
- 6 Summary of Activities of the program:
- 7 The worksoop was conducted in lecture mode due to registration of large number of participants. The MEU Co-ordinator Dr A.W.Patil welcome all the partipants and appreciated their enthuasism of participation. He gave a overview of existing used assessment tools and emphasized the need to think out of box to develop newer assessment tool highlighting the levels of domain to be assessed in CBME curriculum. He also requested participants to review the learning objectives in manner so that it can be measured using newer assessment tools. He also reviewed the characteristics of measurable assessment tools which can be fessible with existing training environment and should be able to evaluate attainment. Another Speaker Dr R.C.Sharma continued the session after tea break and ennumerate the newer methods to measure the attainment of medical attributes. Dr R.C.Sharma also present how to develop “Clinical encounter Cards [CEC]”, “P-MEX”, “Chart stimulated Recall Oral examination”, “liker scale for Direct observation of procedural skills”, and “check list for Use of clinical work sampling [CWS]” . He also presented tempalate as example of these newer methods as an example for the participants. Group task session was replaced with open house “question answer session” to fill the gaps attributed to limited experience to newer methods implementation process. The workshop session was concluded with feedback session. Post test submitted by few participant demonstrated improvement over pretest. Workshop was concluded with vote of thanks to speakers, supporting staff and enthuasim of participants.

1. Name of Program: Seminar: Preservation of Viscera for organ Donation
2. Program Incharge: Dr Aarti Mahale
3. Venue: College Dr CV Raman Lecture Hall
4. Speaker: Dr Shahin Kazi, Dr Preeti and Dr Vaishali S. Anturlikar
5. Dates of Training programs undertaken: 21.01.2023
6. Objectives of Program
 - a. To create awareness of Mandatory Viscera Preservation protocols in cases of Autopsy.
 - b. To provide a awareness regarding DNA specific Procedures and Preservatives.
 - c. To Provide a stepwise operative procedure for All Viscera Preservation.

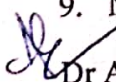

7. Summary of Activities of the program:

The session commenced with an introductory lecture by Dr Shaheen Kazi On the various Preservatives used in autopsy . The talk was focussed on reorienting the participants with the commonly used preservatives as well as specific Preservatives used in poisoning cases on a case to case basis. The talk then manoeuvred itself towards DNA analysis and Viscera Preservation. The use of non-preservative based storage such as air drying for bones, clothes and other similar items. The first session ended with legal protocols in chain of custody of Viscera.

The Second session commenced with presentation by Dr Preeti Pawade to highlight the list of preservatives used for sample required for specific DNA Procedures. She has specifically mentioned about the precautions to be taken for sampling process for specific DNA Procedures. Dr Vaishali S. Anturlikar presented a lucid presentation describing the procedures to be followed strictly during preservation of viscera which is expected to be used for organ transplant. She has specifically mentioned static and dynamic approaches have been in practices since last decades but with advancement of technology, the process are being reviewed. She also explained simple static cold storage approach and perfusion based dynamic method of preservation specially for preservation of different organs like kidneys, livers, lungs, pancreas, or heart.

The session was concluded with vote of thanks to speakers by the chair and participants for patient hearing and inquisitive questions.

 - b. To address the imbalance between number of organ recipients and donors
 - c. To address the abuse of the critical ethical issue not align with prescribed regulations for organ donation.
 - d. To enhance the efficiency and increase the availability of organs
7. Summary of Activities of the program:

The session commenced with an overview of the highlights the features of Transplantation of Human Organs Act (THOA) 1994 and Some of the important amendments under the (Amendment) Act 2011 by Dr R.C.Sharma to the participants. He further emphasized that initiatives by each one of us to address of the challenges of organ donation program by creating awareness and educate the community at large specially about significance of deceased donation would promote the organ donation program. He further sought suggestions from the participants for innovative meaningful eye-catching slogans or pictures for the use as education of community at large to sensitize for deceased or live organ donation program.

The second session focussed on the factors responsible for imbalance between organ recipients and organ donors. The session was taken by Dr R.V.Patil, one of the accomplished senior faculty, he has enumerated the risk factors associated with live organ donation. He presented the some of the advances which have been used with limited success of. Live organ donation and organ transplantation.

After a short break, Dr Dilip R Patil listed the ethical issues and emphasized the ethical organ donation is need of hours to promote national organ donation program. There is need for aggressive interference for unethical organ donation. The participants should initiate to add their

5. Dates of Training programs undertaken: 25.03.2023
6. Objectives of Program:
 - a. To Lists the features of HOTA
 - b. Group Task

7. Summary of Activities of the program:

The talk was heralded by the welcome address to participants by Dr Kailash Gindodia Professor of General Surgery and presented a brief overview of the importance of following medicolegal practices in day to day surgical and allied fields. The talk was commenced with a didactic lecture on the salient aspects of THOT Act 1994 and amendment 2011 by Dr Dilip R. Patil mainly focused on the various mandatory aspects involved in organ transplantation such as nodal agencies which are registered agencies for conducting transplants and maintaining registry of potential recipients.

Dr Shailendra R. Patil focused on the protocols followed for transplantation in living and brain dead cadavers. The notification protocols and reporting methodologies were elaborated with examples.

Dr Shodhan Gondkar initiated an interactive small group discussion on the brain stem death criteria. The learners were divided into 4 groups and were provided with few digital resources to orient themselves. After a 15 minute self-oriented learning session the students were given tasks with describing the salient features. Each group was focused on one aspect and the deficiencies of knowledge were rectified. The session ended with a talk on maintaining medicolegal records.
