Standard Operating Procedures for Quality and Safety Practices of Patient Care Positive impact for day-to-day patients care in our hospital is incorporated as vision and mission of college. Advancement and changing scenario in health care technology demands continuous review of existing SOP and develop newer initiatives to provide quality and safe patient care. IQAC in association thrives upon to plan to improve quality of patient care and patient safety practices for evolving areas in health care system. (Email :

1. Handwashing as one of the best ways to stop the spread of germs and prevent infections in hospitals, thus would reducing the risks and potential errors
2. Immediate corrections and prevention of potential errors, procedural injuries or infections.
3. Use of monitoring technology is used to ensure that medical professionals, nursing professionals, paramedical staff on duty observing the prescribed procedure for the right patient and giving priority to the need of each patient. care.
4. Patient's identity, prescribed medication, prescribed doses, time of dose, and periodical monitoring of patient vital parameters are recorded as per the instructions of attending medical professional.
5. The patients are informed about their own care, prognosis of disease, understanding of treatment prescribed, probable risk, threptic dose ADR as an initiative to build patient confidence.
6. Ensure that patient and their family members understood the medication and medical procedure so as to seek their support to reduce and prevent error during the management procedure.
7. This is utmost important that three tier regular verification of medication dosage, timing, and medical procedure needs to be recorded prior to starting the procedure.
8. One of the initiative for quality care and patient safety health care is constiution of multidisciplinary risk assessment team comprises of medical professionals, nursing and paramedical assessment to identify patient safety issues aud resolve the issues by promoting teamwork among hospital staff.
