### Report on the functioning of the Immunization Clinic:

Our hospital takes the following measures related to immunization clinic:

- Immunization clinic is conducted everyday between 9.30 am to 3.00 PM
- Immunization is conducted in a special room in which antisepsis is maintained thoroughly.
- Special trained staff is appointed for conducting the immunization.
- Before actual immunization procedure, baby's clinical examination is done &anthropometric measurements are done.
- Parents are counseled about importance of immunization & also told about the mild adverse effects that might occur following the immunization.
- UG students & PG students regularly attend the immunization clinics in batches. There, they carefully observe the procedure.
- After giving immunization to children, parents are given immunization card, on which following information is mentioned: type of vaccine given, date of immunization, date of next follow-up.
- Detailed information of the babies who received the immunization is maintained in the register.
